Clifford Numbers and Spinors (Fundamental Theories of Physics) Marcel Riesz

Marcelliesz's lectures delivered on October 1957 -January 1958 at the University of Maryland, College Park, have been previously published only informally as a manuscript entitled CLIFFORD NUMBERS AND SPINORS (Chapters I - IV). As the title says, the lecture notes consist of four Chapters I, II, III and IV. However, in the preface of the lecture notes Riesz refers to Chapters V and VI which he could not finish. Chapter VI is mentioned on pages 1, 3, 16, 38 and 156, which makes it plausible that Riesz was well aware of what he was going to include in the final missing chapters. The present book makes Riesz's classic lecture notes generally available to a wider audience and tries somewhat to fill in one of the last missing chapters. This book also tries to evaluate Riesz's influence on the present research on Clifford algebras and draws special attention to Riesz's contributions in this field - often misunderstood.

From reader reviews:

Peter Gomez:

Do you have favorite book? If you have, what is your favorite's book? Reserve is very important thing for us to be aware of everything in the world. Each guide has different aim or perhaps goal; it means that guide has different type. Some people feel enjoy to spend their time for you to read a book. They are reading whatever they acquire because their hobby is reading a book. How about the person who don't like looking at a book? Sometime, man or woman feel need book when they found difficult problem or maybe exercise. Well, probably you will need this Clifford Numbers and Spinors (Fundamental Theories of Physics).

Lisa Bates:

What do you concentrate on book? It is just for students because they are still students or this for all people in the world, the particular best subject for that? Simply you can be answered for that issue above. Every person has various personality and hobby for every other. Don't to be compelled someone or something that they don't would like do that. You must know how great and also important the book Clifford Numbers and Spinors (Fundamental Theories of Physics). All type of book are you able to see on many sources. You can look for the internet resources or other social media.

Anne Shibata:

Now a day individuals who Living in the era just where everything reachable by talk with the internet and the resources included can be true or not call for people to be aware of each info they get. How a lot more to be smart in acquiring any information nowadays? Of course the answer then is reading a book. Examining a book can help folks out of this uncertainty Information mainly this Clifford Numbers and Spinors (Fundamental Theories of Physics) book because this book offers you rich data and knowledge. Of course the information in this book hundred pct guarantees there is no doubt in it you probably know this.

Lisa Williams:

Can you one of the book lovers? If so, do you ever feeling doubt while you are in the book store? Aim to pick one book that you find out the inside because don't evaluate book by its deal with may doesn't work here is difficult job because you are scared that the inside maybe not while fantastic as in the outside seem likes. Maybe you answer might be Clifford Numbers and Spinors (Fundamental Theories of Physics) why because the great cover that make you consider about the content will not disappoint anyone. The inside or content will be fantastic as the outside as well as cover. Your reading sixth sense will directly direct you to pick up this book.
