## Introduction to Post-Tonal Theory (3rd Edition) Joseph N. Straus

For undergraduate/graduate-level courses in Twentieth-Century Techniques, and Post-Tonal Theory and Analysis taken by music majors.

A *primer*—rather than a survey—this text offers exceptionally clear, simple explanations of basic theoretical concepts for the post-tonal music of the twentieth century. Emphasizing *hands-on* contact with the music—through playing, singing, listening, and analyzing—it provides six chapters on theory, each illustrated with musical examples and fully worked-out analyses, all drawn largely from the “classical” pre-war repertoire by Schoenberg, Stravinsky, Bartok, Berg, and Webern.

"Straus takes a paced, methodical, logical approach to each topic. He introduces it in context and — perhaps most significantly of all — uses language that's so transparent that merely to follow his descriptions, explanations and illustrations carefully is to understand each aspect of the theory under consideration." Mark Sealey, Classical.net
