This clinical section presents three patient populations (pediatric, athletic, and elderly); three pain-related types (headache, neck and shoulder pain, and low back pain); and six conditions that massage therapists may encounter: pregnancy and labor, scar treatment, cancer, fibromyalgia, anxiety and depression, and clients who have experienced sexual trauma. It provides readers with the fundamental tools for a research-based approach in clinical practice, especially as it relates to special populations. A running glossary, chapter summaries, and critical thinking questions assist students in learning the content and act as self-study tools for practitioners.
