Bodies of Thought: Embodiment, Identity and Modernity Ian Burkitt

In this incisive and truly impressive book, Ian Burkitt critically addresses the dualism between mind and body, thought and emotion, rationality and irrationality, and the mental and the material, which haunt the post-Cartesian world.

Drawing on the work of contemporary social theorists and feminist writers, he argues that thought and the sense of being a person is inseparable from bodily practices within social relations, even though such active experience may be abstracted and expanded upon through the use of symbols. Overcoming classic dualisms in social thought, Burkitt argues that bodies are not purely the constructs of discourses of power: they are also productive, communicative, and invested with powerful capacities for change.
