The End of Faith Sam Harris

An impassioned plea for reason in a world divided by faith. This important and timely work delivers a startling analysis of the clash of faith and reason in today's world.

Harris offers a vivid historical tour of mankind's willingness to suspend reason in favor of religious beliefs, even when those beliefs are used to justify harmful behavior and sometimes heinous crimes. He asserts that in the shadow of weapons of mass destruction, the world can no longer tolerate views that pit one true god against another. Most controversially, he argues that we cannot afford moderate lip service to religion—an accommodation that only blinds us to the real perils of fundamentalism. While warning against the encroachment of organized religion into world politics, Harris also draws on new evidence from neuroscience and insights from philosophy to explore spirituality as a biological, brain-based need. He calls on us to invoke that need in taking a secular humanistic approach to solving the problems of this world.
