Forming using metal characteristics: Fold forming : introduction and technical procedures Charles Lewton-Brain

This is not Charles Lewton-Brain's 2009 all-color book entitled 'Foldforming'. This is his original classic paper that started the fold-forming scene. Fold forming is a system of sheet metal forming which emphasizes forming using the metals characteristics. Forms are derived from the natural plasticity, ductility and elasticity of the metal. The system is internationally recognized as a new approach to working metal. It is extremely efficient and rapid. Tools are simple: fingers, hands, anvil hammers, mallets, and rolling mills. The paper has a theoretical introduction and step-by-step recipes for quickly working sheet metal. 49 pages, over 70 B/W line drawings.
