Network Warrior: Everything you need to know that wasn't on the CCNA exam Gary A. Donahue

Written by networking veteran with 20 years of experience, *Network Warrior* provides a thorough and practical introduction to the entire network infrastructure, from cabling to the routers. What you need to learn to pass a Cisco certification exam such as CCNA and what you need to know to survive in the real world are two very different things. The strategies that this book offers weren 't on the exam, but they 're exactly what you need to do your job well.

Network Warrior takes you step by step through the world of hubs, switches, firewalls, and more, including ways to troubleshoot a congested network, and when to upgrade and why. Along the way, you 'll gain an historical perspective of various networking features, such as the way Ethernet evolved. Based on the author 's own experience as well as those he worked for and with, Network Warrior is a Cisco-centric book, focused primarily on the TCP/IP protocol and Ethernet networks -- the realm that Cisco Systems now dominates. The book covers:

The type of networks now in use, from LANs, WANs and MANs to CANs

- The OSI Model and the layers involved in sending data
- Hubs, repeaters, switches, and trunks in practice
- Auto negotiation and why it 's a common problem in network slowdowns
- Route maps, routing protocols, and switching algorithms in Cisco routers
- The resilient Ethernet -- how to make things truly redundant
- Cisco 6500 multi-layer switches and the Catalyst 3750 switch
- Telecom nomenclature -- why it 's different from the data world
- T1 and DS3
- Firewall theory, designing access lists, authentication in Cisco devices
- Server load balancing technology
- Content switch module in action
- Designing QOS and what QOS does not do
- IP design and subnetting made easy

The book also explains how to sell your ideas to management, how networks become a mess as a company grows, and why change control is your friend. *Network Warrior* will help network administrators and engineers win the complex battles they face every day.
