In an era where every symptom becomes a deficiency of the latest drug, it makes the word "cure" sound as though it borders on quackery. But nothing could be further from the truth. For example, the leading diabetes prescription medications have quadrupled the heart attack rate, increased bladder cancers and depleted vitamin B12 which leads to exhaustion, impotence, Alzheimer's, and much more. In fact the leading diabetes medication according to the Journal of the American Medical Association 2010 doubles the heart attack rate. Furthermore, lowering the main test that doctors use to monitor diabetes (the hemoglobin A1C) with a diabetes drug increases death 22%. As well, diabetes drugs set folks up for blindness from retinopathy, renal failure in 37% which requires dialysis which then leads to heavy metal toxicity, a 33-70 % increase in cancer, 50% get memory loss, and much more. Even a study in the 2008 New England Journal of Medicine showed that you can give all the best medications to diabetics for 5 years making their blood tests look normal, but it does not change their rate of dying one iota. One in four Americans over 60 has diabetes and three times that number are pre-diabetic with hypertension, elevated cholesterol or triglycerides, obesity, NASH (not alcoholic steatohepatitis or fatty liver disease), and/or Metabolic Syndrome X (insulin resistance). Diabetes is clearly our best example of accelerated aging. And as far as the multiple curable causes of diabetes go, the #1 cause permeates 80% of our diet. Yet the FDA limit on this #1 cause is 500 times higher than the dose that researchers use to create diabetes. The good news is sometimes as little as pennies of non-prescription nutrients can literally cure diabetic nephropathy (kidney disease), prevent amputations, reverse diabetic retinopathy, as well as reverse diabetes to the point of needing no medications. Come and learn how to empower yourself (contains well over 1000 references).
