Among medieval Christian societies, Byzantium is unique in preserving an ecclesiastical ritual of *adelphopoiesis*, which pronounces two men, not related by birth, as brothers for life. It has its origin as a spiritual blessing in the monastic world of late antiquity, and it becomes a popular social networking strategy among lay people from the ninth century onwards, even finding application in recent times. Located at the intersection of religion and society, brother-making exemplifies how social practice can become ritualized and subsequently subjected to attempts of ecclesiastical and legal control.

Controversially, *adelphopoiesis* was at the center of a modern debate about the existence of same-sex unions in medieval Europe. This book, the first ever comprehensive history of this unique feature of Byzantine life, argues persuasively that the ecclesiastical ritual to bless a relationship between two men bears no resemblance to marriage. Wide-ranging in its use of sources, from a complete census of the manuscripts containing the ritual of *adelphopoiesis* to the literature and archaeology of early monasticism, and from the works of hagiographers, historiographers, and legal experts in Byzantium to comparative material in the Latin West and the Slavic world, *Brother-Making in Late Antiquity and Byzantium* examines the fascinating religious and social features of the ritual, shedding light on little known aspects of Byzantine society.
