Structures & Architecture

Structures & Architecture

Although Architecture and Structural Engineering have both had their own historical development, their interaction has led to many fascinating and delightful structures over time. To bring this interaction to a higher level, there is the need to stimulate the inventive and creative design of architectural structures and to persuade architects and structural engineers to work together in this process, exploiting constructive principles and aesthetic and static values.

Structures and architecture presents over 250 selected contributions and addresses all major aspects of structures and architecture, including comprehension of complex forms, computer and experimental methods, concrete and masonry structures, emerging technologies, glass structures, innovative architectural and structural design, lightweight and membrane structures, special structures, steel and composite structures, the borderline between architecture and structural engineering, the tectonic of new solutions, the use of new materials, timber structures, the history of the relationship between architects and structural engineers, among others.

This book of abstracts and the searchable CD-ROM with full papers contain the contributions presented at the 1st International Conference on Structures and Architecture (ICSA2010). This event was organized by the School of Architecture of the University of Minho, Guimarães, Portugal (July 2010), to promote the synergy between both disciplines.

The contributions on creative and scientific aspects in the conception and construction of structures, on advanced technologies and on complex architectural and structural applications represent a fine blend of scientific, technical and practical novelties in both fields.

This set is intended for both researchers and practitioners, including architects, structural and construction engineers, builders and building consultants, constructors, material suppliers, product manufacturers and other experts and professionals involved in the design and realization of architectural, structural and infrastructural projects.

From reader reviews:

Lou Morton:

Information is provisions for anyone to get better life, information today can get by anyone on everywhere. The information can be a knowledge or any news even restricted. What people must be consider any time those information which is from the former life are challenging be find than now's taking seriously which one works to believe or which one the resource are convinced. If you receive the unstable resource then you obtain it as your main information it will have huge disadvantage for you. All those possibilities will not happen with you if you take Structures & Architecture as your daily resource information.

Jane Rich:

This book untitled Structures & Architecture to be one of several books in which best seller in this year, honestly, that is because when you read this publication you can get a lot of benefit in it. You will easily to buy this particular book in the book store or you can order it by using online. The publisher with this book sells the e-book too. It makes you quicker to read this book, as you can read this book in your Mobile phone. So there is no reason to your account to past this guide from your list.

Carla Floyd:

Reading a e-book tends to be new life style within this era globalization. With reading you can get a lot of information that will give you benefit in your life. Along with book everyone in this world can share their idea. Publications can also inspire a lot of people. Many author can inspire all their reader with their story or perhaps their experience. Not only the story that share in the guides. But also they write about the knowledge about something that you need case in point. How to get the good score toefl, or how to teach your young ones, there are many kinds of book which exist now. The authors nowadays always try to improve their proficiency in writing, they also doing some research before they write with their book. One of them is this Structures & Architecture.

Juanita Stoneman:

Your reading 6th sense will not betray a person, why because this Structures & Architecture guide written by well-known writer we are excited for well how to make book which might be understand by anyone who have read the book. Written inside good manner for you, leaking every ideas and creating skill only for eliminate your own personal hunger then you still skepticism Structures & Architecture as good book not simply by the cover but also by the content. This is one e-book that can break don't evaluate book by its cover, so do you still needing yet another sixth sense to pick this kind of!? Oh come on your examining sixth sense already said so why you have to listening to one more sixth sense.
