Coping with Drought Risk in Agriculture and Water Supply Systems: Drought Management and Policy Development in the Mediterranean (Advances in Natural and Technological Hazards Research)

Coping with Drought Risk in Agriculture and Water Supply Systems: Drought Management and Policy Development in the Mediterranean (Advances in Natural and Technological Hazards Research)

Over the last three decades drought episodes have resulted in severe social problems in Mediterranean countries, receiving broad attention from the international scientific and policy communities. The experiences in the development and implementation of drought management plans highlight the success and challenges of coping with drought for societies with different vulnerabilities and emphasize risk-based drought management as a critical approach to mitigate the impacts associated to drought-induced water shortages. Based on these experiences and the current methods for evaluating risk, the book synthesises guidelines for drought management that link science and policy and that can be applied to other regions.

The book comprises a collection of papers divided into four sections that appeal to a broad audience. First, the social and hydrological context of Mediterranean countries is presented, discussing the interactions that have resulted in the complex institutional framework, and highlighting the importance of stakeholder involvement and awareness building for successful drought management. This section emphasises the role of organizations, institutions, and civil stakeholders involved in drought preparedness and mitigation and/or on water management for designing effective risk based strategies that mitigate the effects of drought in agriculture and water supply systems.

Second, the book presents an academic approach to risk evaluation, including characterization of drought episodes, development of indicators of risk in hydrological and agricultural systems, and analysis of the role of economic instruments and groundwater for risk mitigation. This section finalises with the description of an integrated method for evaluating social vulnerability based on indicators that include the capacity to anticipate, cope, and respond to drought.

The third section includes a collection of case studies that include the description of effective measures taken in the past. These case studies provide the context for developing demand driven guidelines that may be applied to other regions. The authors of these chapters can be viewed as stakeholders in drought management, since they represent a broad range of sectors and institutions from Mediterranean European and North African countries. The topics addressed have implications for the international policy community interested in disaster mitigation, agricultural policy, and development.

Finally a synthesis of the management actions is presented in four chapters. Monitoring and preparedness planning is the essential first step for moving from disaster to risk management in response to drought. The management actions related to agriculture and water supply systems are presented in two different chapters but with a common conceptual framework based on the use of drought indicators for evaluating the levels of drought risk (pre-alert, alert, and emergency), that allow establishing linkages between science and policy. The final chapter discusses the lessons learned and application to other regions.

Download and Read Free Online Coping with Drought Risk in Agriculture and Water Supply Systems: Drought Management and Policy Development in the Mediterranean (Advances in Natural and Technological Hazards Research)

From reader reviews:

Mark Cabrera:

The book Coping with Drought Risk in Agriculture and Water Supply Systems: Drought Management and Policy Development in the Mediterranean (Advances in Natural and Technological Hazards Research) make you feel enjoy for your spare time. You can utilize to make your capable far more increase. Book can to become your best friend when you getting anxiety or having big problem along with your subject. If you can make reading through a book Coping with Drought Risk in Agriculture and Water Supply Systems: Drought Management and Policy Development in the Mediterranean (Advances in Natural and Technological Hazards Research) for being your habit, you can get a lot more advantages, like add your capable, increase your knowledge about some or all subjects. You are able to know everything if you like start and read a guide Coping with Drought Risk in Agriculture and Water Supply Systems: Drought Management and Policy Development in the Mediterranean (Advances in Natural and Technological Hazards Research). Kinds of book are several. It means that, science reserve or encyclopedia or other folks. So , how do you think about this guide?

Karolyn Kaufman:

Here thing why this Coping with Drought Risk in Agriculture and Water Supply Systems: Drought Management and Policy Development in the Mediterranean (Advances in Natural and Technological Hazards Research) are different and dependable to be yours. First of all reading through a book is good nonetheless it depends in the content of the usb ports which is the content is as delicious as food or not. Coping with Drought Risk in Agriculture and Water Supply Systems: Drought Management and Policy Development in the Mediterranean (Advances in Natural and Technological Hazards Research) giving you information deeper and different ways, you can find any reserve out there but there is no book that similar with Coping with Drought Risk in Agriculture and Water Supply Systems: Drought Management and Policy Development in the Mediterranean (Advances in Natural and Technological Hazards Research). It gives you thrill studying journey, its open up your own eyes about the thing that happened in the world which is maybe can be happened around you. It is easy to bring everywhere like in recreation area, café, or even in your approach home by train. If you are having difficulties in bringing the printed book maybe the form of Coping with Drought Risk in Agriculture and Water Supply Systems: Drought Management and Policy Development in the Mediterranean (Advances in Natural and Technological Hazards Research) in e-book can be your option.

Andrew Jefferson:

Nowadays reading books become more than want or need but also be a life style. This reading routine give you lot of advantages. Associate programs you got of course the knowledge the rest of the information inside the book that will improve your knowledge and information. The info you get based on what kind of reserve you read, if you want attract knowledge just go with knowledge books but if you want sense happy read one with theme for entertaining like comic or novel. The actual Coping with Drought Risk in Agriculture and Water Supply Systems: Drought Management and Policy Development in the Mediterranean (Advances in

Natural and Technological Hazards Research) is kind of publication which is giving the reader unpredictable experience.

Harvey Lee:

Playing with family inside a park, coming to see the ocean world or hanging out with friends is thing that usually you will have done when you have spare time, after that why you don't try point that really opposite from that. One particular activity that make you not experience tired but still relaxing, trilling like on roller coaster you already been ride on and with addition details. Even you love Coping with Drought Risk in Agriculture and Water Supply Systems: Drought Management and Policy Development in the Mediterranean (Advances in Natural and Technological Hazards Research), it is possible to enjoy both. It is great combination right, you still need to miss it? What kind of hang type is it? Oh come on its mind hangout fellas. What? Still don't have it, oh come on its known as reading friends.
