Cyberactivism on the Participatory Web (Routledge Studies in New Media and Cyberculture)

Cyberactivism on the Participatory Web (Routledge Studies in New Media and Cyberculture)

Cyberactivism already has a rich history, but over the past decade the participatory web?with its decentralized information/media sharing, portability, storage capacity, and user-generated content?has reshaped political and social change. *Cyberactivism on the Participatory Web* examines the impact of these new technologies on political organizing and protest across the political spectrum, from the Arab Spring to artists to far-right groups. Linking new information and communication technologies to possibilities for solidarity and action?as well as surveillance and control?in a context of global capital flow, war, and environmental crisis, the contributors to this volume provide nuanced analyses of the dramatic transformations in media, citizenship, and social movements taking place today.
