Redrawing the Map to Promote Peace: Territorial Dispute Management via Territorial Changes (Innovations in the Study of World Politics) Jaroslav Tir

Redrawing the Map to Promote Peace, by Jaroslav Tir, primarily focuses on the management of territorial disputes and how they are altered by territorial change. Territorial shifts can sometimes lead to war, which is why Tir explores the contributing factors that lead to these disputes. He states two primary variables associated with the change-dispute relationship: the value of the territory in question and how the territorial changes occur. Tir also discusses three types of territorial change: interstate territorial transfers, secessions, and unifications. Despite the likelihood of territorial dispute stemming from territorial changes, this book provides evidence supporting the claim that territorial change can be handled in a manner that could decrease the probability of dispute. Tir offers insight into some contributing factors of these disputes and how they impact the hope for peace in the future.
