DAS 16, Cope: The Algorithmic Composer (2000) David Cope

The Algorithmic Composer completes a trilogy of books of which Computers and Musical Style (DAS6) and Experiments in Musical Intelligence (DAS12) comprise the first two volumes. The Algorithmic Composer describes in detail the need for, concepts of, and use of computer-assisted composition and includes a CD-ROM containing the Alice (ALgorithmically Integrated Composing Environment) program, a subset of the program Experiments in Musical Intelligence. Alice extends user-composed passages, develops potentials of composer-created germ ideas, and offers new ideas when inspiration temporarily wanes. In the course of this fascinating book, David Cope explores various algorithmic composing programs, including the programs Experiments in Musical Intelligence and SARA, and fundamental issues, such as Markov chains, randomness and association nets. He also takes up the aspect of inference with regard to tonality, non-pitch elements, variation, texture and the ensuing rules that can be derived. In addition, his discussion of structure involves an understanding of signatures and pattern-matching, as well as hierarchical patterns as they play into composition. In this groundbreaking book Cope not only discusses the possibilities that exist for computer-assisted composition, but also challenges preconceived notions of invention by computer. His vision encompasses a "music of the future" that fuses computerized craft with human ingenuity. Above all, The Algorithmic Composer makes a bold statement on tomorrow's music.

From reader reviews:

Steve Bennett:

People live in this new moment of lifestyle always make an effort to and must have the spare time or they will get large amount of stress from both day to day life and work. So , when we ask do people have spare time, we will say absolutely yes. People is human not really a huge robot. Then we request again, what kind of activity have you got when the spare time coming to you actually of course your answer will certainly unlimited right. Then ever try this one, reading guides. It can be your alternative in spending your spare time, the book you have read is definitely DAS 16, Cope: The Algorithmic Composer (2000).

Selma Lang:

The book untitled DAS 16, Cope: The Algorithmic Composer (2000) contain a lot of information on the item. The writer explains your girlfriend idea with easy means. The language is very simple to implement all the people, so do not worry, you can easy to read that. The book was authored by famous author. The author will take you in the new era of literary works. You can read this book because you can read on your smart phone, or program, so you can read the book within anywhere and anytime. If you want to buy the e-book, you can open their official web-site along with order it. Have a nice examine.

Nicholas McNeal:

Many people spending their time frame by playing outside together with friends, fun activity along with family or just watching TV all day long. You can have new activity to invest your whole day by studying a book. Ugh, do you think reading a book can definitely hard because you have to take the book everywhere? It fine you can have the e-book, getting everywhere you want in your Smartphone. Like DAS 16, Cope: The Algorithmic Composer (2000) which is finding the e-book version. So , why not try out this book? Let's notice.

Maureen Smiley:

As a student exactly feel bored to be able to reading. If their teacher questioned them to go to the library or even make summary for some reserve, they are complained. Just tiny students that has reading's internal or real their pastime. They just do what the instructor want, like asked to the library. They go to at this time there but nothing reading significantly. Any students feel that reading is not important, boring and can't see colorful pictures on there. Yeah, it is being complicated. Book is very important for yourself. As we know that on this age, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. Therefore this DAS 16, Cope: The Algorithmic Composer (2000) can make you feel more interested to read.
