The Theory of Turbulence: Subrahmanyan Chandrasekhar's 1954 Lectures (Lecture Notes in Physics)

The Theory of Turbulence: Subrahmanyan Chandrasekhar's 1954 Lectures (Lecture Notes in Physics)

In January 1937, Nobel laureate in Physics Subrahmanyan Chandrasekhar was recruited to the University of Chicago. He was to remain there for his entire career, becoming Morton D. Hull Distinguished Service Professor of Theoretical Astrophysics in 1952 and attaining emeritus status in 1985. This is where his then student Ed Spiegel met him during the summer of 1954, attended his lectures on turbulence and jotted down the notes in hand. His lectures had a twofold purpose: they not only provided a very elementary introduction to some aspects of the subject for novices, they also allowed Chandra to organize his thoughts in preparation to formulating his attack on the statistical problem of homogeneous turbulence. After each lecture Ed Spiegel transcribed the notes and filled in the details of the derivations that Chandrasekhar had not included, trying to preserve the spirit of his presentation and even adding some of his side remarks. The lectures were rather impromptu and the notes as presented here are as they were set down originally in 1954. Now they are being made generally available for Chandrasekhar's centennial.

From reader reviews:

Maria Abel:

Why don't make it to become your habit? Right now, try to ready your time to do the important work, like looking for your favorite guide and reading a reserve. Beside you can solve your condition; you can add your knowledge by the e-book entitled The Theory of Turbulence: Subrahmanyan Chandrasekhar's 1954 Lectures (Lecture Notes in Physics). Try to make the book The Theory of Turbulence: Subrahmanyan Chandrasekhar's 1954 Lectures (Lecture Notes in Physics) as your buddy. It means that it can to get your friend when you feel alone and beside associated with course make you smarter than in the past. Yeah, it is very fortunated to suit your needs. The book makes you much more confidence because you can know every little thing by the book. So , we should make new experience and also knowledge with this book.

Brittany Belliveau:

What do you about book? It is not important along? Or just adding material when you require something to explain what you problem? How about your free time? Or are you busy person? If you don't have spare time to try and do others business, it is give you a sense of feeling bored faster. And you have extra time? What did you do? All people has many questions above. They have to answer that question mainly because just their can do which. It said that about guide. Book is familiar on every person. Yes, it is proper. Because start from on pre-school until university need this specific The Theory of Turbulence: Subrahmanyan Chandrasekhar's 1954 Lectures (Lecture Notes in Physics) to read.

Keiko Whitchurch:

Many people spending their time frame by playing outside along with friends, fun activity along with family or just watching TV 24 hours a day. You can have new activity to spend your whole day by reading a book. Ugh, you think reading a book will surely hard because you have to accept the book everywhere? It okay you can have the e-book, delivering everywhere you want in your Smartphone. Like The Theory of Turbulence: Subrahmanyan Chandrasekhar's 1954 Lectures (Lecture Notes in Physics) which is having the e-book version. So , why not try out this book? Let's notice.

Gail Cote:

As a university student exactly feel bored to be able to reading. If their teacher questioned them to go to the library as well as to make summary for some book, they are complained. Just small students that has reading's soul or real their interest. They just do what the professor want, like asked to the library. They go to generally there but nothing reading really. Any students feel that studying is not important, boring and can't see colorful pics on there. Yeah, it is to become complicated. Book is very important for you. As we know that on this age, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. Therefore , this The Theory of Turbulence: Subrahmanyan Chandrasekhar's 1954 Lectures (Lecture Notes in Physics) can make you truly feel more interested to read.
